TECHNICAL SKILLS

- **Basic Web Development**
- Database Management
- Github Repository
- Basic Web Deployment

WORK TOOLS

- **Languages:** HTML5, CSS3, JavaScript (ES6+), PHP, SQL, Python, Java
- **Frameworks & Libraries:** React, Next.js, Node.js, Express.js, Tailwind CSS
- **Tools & Databases:** MySQL, Supabase, Git, GitHub, VS Code, XAMPP, phpMyAdmin, Vite

CORE WORK SKILLS

- High Trainability & Skill Acquisition
- Quality-Driven Work Ethics
- Continuous Learning

PROFILE SUMMARY

An adaptable, highly motivated Information Technology student with hands-on experience engineering responsive user interfaces, relational MySQL databases, and modular full-stack web applications. Currently building custom web platforms and interactive software projects as a Student Developer using PHP, JavaScript, and modern web frameworks. Dedicated to mastering full-stack software architecture, continually expanding technical skills, and earning the freeCodeCamp Responsive Web Design certification

EDUCATION & CERTIFICATION

Bachelor of Science in Information Technology

PHINMA Cagayan de Oro College | 2023 – Present

Legacy Responsive Web Design V8 Certification

freeCodeCamp | Dec 2024

WORK EXPERIENCE

STUDENT WEB DEVELOPER — POINT OF SALE (POS-AR) SYSTEM

PHINMA Cagayan de Oro College | Oct 2026

Engineered a web-based store management platform featuring a keyboard-first cashier checkout interface.

- Built dynamic subtotal calculation, credit terms tracking, master file product management, and receipt preview modules using PHP PDO, MySQL, and JavaScript.

PROJECTS

HERO'S ROLL — COZY RPG SLOT MACHINE

bit.ly/47LsohS |Personal Project | Sep 2026
HTML5 | CSS3 | Vanilla JavaScript
Developed a retro arcade slot machine web application featuring a soft indie cozy RPG aesthetic and immutable state architecture.

- **Built a zero `let` keyword architecture using static state object mutations and DOM-driven access locks.**
- **Implemented a balanced 26.17% win probability odds matrix and cascading flywheel friction delay spin effects.**

BULUA HUB — BARANGAY COMMUNITY INFORMATION WEBSITE

https://bit.ly/4yZ49Ic | Personal Project | Sept 2026
HTML5 | CSS3 | JavaScript | Google Maps API
Built a multi-page community information web platform and cultural archive for Barangay Bulua, Cagayan de Oro City.

- **Created structured public service matrices detailing civil document processing timelines and emergency directory channels.**
- **Integrated pure CSS accordion notice boards and Google Maps boundary embeds without heavy external framework bloat.**

ACTIVITIES

Capstone Project Sys Developer

PHINMA Cagayan de Oro College | Aug 2026 – Oct 2026

- **Managed technical documentation, ERD diagrams for future capstone**
